Subject: Animal collagen vs HUMAN collagen

Subject: Collagen doesn't work, unless...

Subject: This HUMAN collagen makes you look young again

Subject: Why skin ages and how to reverse it

What do bags under your eyes, wrinkles and brittle nails have in common?

Answer: They're all caused by collagen decline.

According to The British Journal of Dermatology, starting at age 20, **your collagen production declines by over 1% per year**. And the WORSE NEWS is...

Most popular collagen-boosting supplements simply do NOT work.

Here's why:

Most collagen supplements available today are made from animal collagen. And studies show **animal collagen can only boost your body's collagen levels by up to 3%**.

Do you see the problem?

That small 3% boost can't make up for the massive 10% of collagen you've already lost by the time your 30...

... or the 20% you've lost by age 40...

... and the 30% you've lost by age 50.

Which means they'll do next to nothing to give you smoother skin, less fine lines & wrinkles, and get rid of age spots.

If you really want to beat collagen decline – and rejuvenate your

youthful completion – **animal collagen alone is NOT enough...**

To turn back the clock on aging skin, you need more [HUMAN collagen](#).
