

[HEADLINE ABOVE VSL]

Columbia University Scientists Helped:

**16 Ordinary Americans
Melt Off 1 Pound of Fat, Every 8 Days...
by Eating ‘Morning Oil’ Muffins for
Breakfast.**

[VSL SCRIPT STARTS]

[OPENING LINES VERSION 1]

Columbia University scientists recently helped **16 Ordinary Americans melt off 1 pound of fat... every 8 days...** like clockwork...

By simply eating breakfast muffins made with a special ‘Morning Oil’.^[1]

So if you feel anything like I used to feel...

Where I was sick of struggling with my weight, every single day...

Acting like my fat didn’t bother me...

And pretending I was ‘OKAY’ with the body I had, then...

You’ll want to pay close attention to this groundbreaking fat-loss study’s conclusive results...

That showed how the 16 ordinary Americans eating these ‘Morning Oil’ Muffins...

... **lost 56% more weight, and...**

... **burned over 6 & 1/2 times more belly fat...**

... compared to the control group eating muffins **without** this Morning Oil.

This groundbreaking study was led by Human Nutrition expert, **Marie-Pierre St-Onge, Ph.D. ...**

And the fantastic fat-loss results have been *verified by, and published in,* the **peer-reviewed American Journal of Clinical Nutrition.**

Proving that it *really* is possible to drop 1 pound of fat, every 8 days, with this 'Morning Oil'.

You'll see exactly how it works in this video...

Along with a *faster way* you can burn fat with this 'Morning Oil'... even without spending time baking muffins.

[/OPENING LINES VERSION 1 ENDS]

[OPENING LINES VERSION 2]

How would you like to wake up to the *comforting & relaxing* smell of **home-baked breakfast muffins** each morning?

And better still...

Enjoy their deliciously chocolate taste 100% guilt free!

You take a bite of the warm, moist muffin...

And in that moment...

You're overcome with feelings of satisfaction, confidence, and appreciation...

Because you know ***these are no ordinary muffins...***

These delicious breakfast muffins are **your secret** to *melting of pounds of fat with ease*.

For some people, that may sound like a fantasy...

But I'm excited to share the news that it could soon be your reality...

And it's all thanks to one secret ingredient inside these breakfast muffins.

A delicious **'Morning Oil'**.

In fact...

It's the same 'Morning Oil' that was used in a groundbreaking Columbia University fat-loss study...

Where **16 ordinary Americans** ate these muffins to...

... burn off 1 pound of fat, every 8 days, like clockwork.

[/OPENING LINES VERSION 2 ENDS]

Now losing 1 pound of fat every 8 days might not sound like much...

But it adds up quickly.

Especially when it's as easy as eating muffins for breakfast.

In about 2 weeks, you'd be down 2 pounds, and your favorite dress or skinny jeans will fit more comfortably again.

Then in about a month, you'd be down almost 4 pounds...

That's the point where you'll wake up one morning and notice a *slimmer face in the mirror*...

Your energy, vitality, and elasticity of your skin will start to feel restored...

And you'll feel a surge of confidence in knowing you're finally regaining control of your body and your life...

Then within 6 weeks...

You'll be down over 5 pounds. That's the point when friends and family start noticing.

"What are you doing to lose weight?" they'll ask.

"Practically nothing," you'll be able to reply.

Because as these Ivy League scientists have recently discovered...

This little-known 'Morning Oil' does *almost* all of the hard work for you...

Because it gets absorbed into your body so fast...

It **tricks your fat-cells** into thinking you've consumed a mountain of food...

And **activates a weird metabolic hack** that practically forces you to *burn fat from all over your body* ^[2] ...

And that's WITHOUT even having to exercise more, give up your favorite foods...

... or make any big changes to your diet.

As a certified health and fitness expert...

... I'll be the first to admit this sounded almost too good to be true.

My name is **Andrea Taylor**...

And after gaining 30 pounds of flab in my senior year of high school [3] ...

... to later losing all that weight and becoming a professional bikini bodybuilding competitor...

[INSERT PHOTO OF ANDREA COMPETING IN BODYBUILDING AND PHOTO OF ANDREA IN SENIOR YEAR OF HIGH SCHOOL IS WE HAVE A PIC OF THIS.]

I thought I knew everything there was to know about losing weight.

So when I first came across this new fat-loss breakthrough...

... I was shocked and humbled by just how effective it was.

And how it's already helping thousands of people, with all kinds of body types, achieve their body-weight goals with surprising ease.

I'm confident this breakthrough is unlike anything you'll have ever seen or heard of before...

... because the research behind it is so new.

Yet more studies are now starting to appear from famous universities all over the world...

Including McGill University in Canada, Oxford Brookes University in England, and the University of Geneva in Switzerland [4], [5], [6]...

And they are all confirming the same amazing results.

This 'Morning Oil' replicates the effects of a long-lost fat-burning gene... forcing your body to burn as much fat as it can.

Keeping your body locked in fat-burning mode day after day...

Helping you to keep fat away permanently...

Meaning you can feel more attractive and body-confident in even your most

slim-fitting clothes...

And in just a few minutes from now...

- I'm going to share how these Columbia University doctors shocked *even themselves* when they **helped 16 ordinary Americans lose 1 lb. per week** just by **eating muffins**.
- Plus, how to defeat the **biological boobytrap** that keeps fat clinging to your body, no matter how hard you diet or exercise...
- You'll also see how a **long-lost fat-burning gene** holds the key to kickstarting your easy fat loss...
- And finally, I'm even going to be sharing **the delicious 'Morning Oil' Muffin recipe** that helped those 16 Ordinary Americans burn nearly 1 pound of fat per week...

... and an **even easier shortcut** if you don't feel like baking muffins.

That's why I urge you to **invest just a few minutes**...

And *watch today's video presentation in full* while you can...

So you can start reaping the same fat-loss rewards of these tasty muffins for yourself... ^[1]

All from the comfort of your own home, without having to wait another moment longer.

And even without even having to bake muffins if you're short on time.

So as I mentioned, my name is Andrea Taylor...

I'm a mother of 4 amazing kids, and a certified personal trainer and sports nutritionist.

I've been featured in major health magazines including *FLEX*, *Muscle & Fitness*, and *Ironman*.

And I own a gym in Southern California...

Where I help women & men of all ages, shapes, and sizes achieve bodies they love and can be proud of.

I'm excited by the massive transformations I've helped thousands of people

achieve through my career in fitness and nutrition.

But what I want to share with you today **is NOT a workout routine...**

And it's NOT a diet plan...

Instead...

It's a simple 'Morning Oil' that *alters your body's Metabolic Commands* ^[7]...

Forcing your body to almost effortlessly burn off fat, just like the people in the Muffin Experiment did. ^[1]

You see...

Before these scientists started the "muffin experiment"...

They knew that it would be tough for ordinary Americans to lose fat and keep it off.

After all...

The latest research from Columbia University, Harvard, Yale, and Johns Hopkins School of Medicine all show that... ^{[8] [9] [10] [11]}

You've lost a key fat-burning gene.

Now before I tell you more about this lost fat-burning gene, and how you can mimic it's effects today to trigger total-body fat loss...

You should that because you've lost this key fat-burning gene, this means it doesn't matter how little food you eat...

Or whether you train like an athlete in the gym...

You will always struggle to trim down your body fat.

This is why so many people experience the yo-yo fat-loss effect...

Where they work so hard to slim down, just to see all the fat they lost return a few months later.

You may have even experienced this yourself...

Scientists call this **Body-Weight Homeostasis**. ^[9]

And here's how it works:

Your fat cells are constantly sending metabolic commands to your

brain. [7]

And these metabolic commands tell your brain to regulate your body's metabolism.

Your brain can do this by regulating your temperature and producing hormones that influence your body weight. [12]

There are 3 types of Metabolic Commands your fat cells can send:

- Firstly, there's the **Metabolic GAIN Command** – which *slows down your metabolism*, so you gain more body fat.
- Next is the **Metabolic HOLD Command** – which *maintains your metabolism* to hold onto existing body fat.

And finally, and *most importantly...*

- There's the **Metabolic BURN Command** – which *speeds up your metabolism* to burn off your body fat.

As you can see...

The Metabolic Commands your fat cells send determines how much fat your body stores.

This means if you want to lose fat... and keep it off for good... your fat cells need to send more Metabolic BURN Commands.

Now if you're like most people who struggle to lose weight...

Then your Metabolic Commands are constantly telling your body to cling on to all of its fat.

And in a lot of cases, they're even telling your body to *pile on MORE fat.*

Why does this happen?

There's actually a simple explanation.

It's all got to do with the difference between us humans and chimpanzees.

And as strange as that sounds...

Let me ask you an odd question that I promise will explain everything...

Have you ever seen a fat chimpanzee?

I know I haven't...

Most chimpanzees I've seen are incredibly lean and muscular.

[IMAGE BESIDE TEXT OF A LEAN LOOKING CHIMPANZEE]

We share 99% of our DNA with primates...

Yet while most primates enjoy an average body-fat percentage of less than 9%...

The average American's body-fat percentage is a whopping 34%. ^[13]

That makes humans almost 4 times FATTER than chimpanzees!

Now, the fact that humans are chubbier than chimps is not breaking news. However...

In June of 2019, researchers from Duke University pinpointed the exact reason WHY humans are the plumpest primate. ^[14]

And pay close attention to this...

Because understanding this one thing is the key to burning off fat easily.

After examining the DNA of both chimps and humans...

... the researchers found one recurring snippet of DNA that is **deactivated in humans.**

This snippet of DNA is called **Nuclear Factor 1-A.**

And this **Nuclear Factor 1-A** gene promotes fat burning...

It signals chimp fat-cells to send **Metabolic BURN Commands** to promote the breakdown of stored body fat. ^[15]

It's how chimps stay so effortlessly lean...

... without giving a second thought to what they eat, or *even* how much they eat.

And in a minute...

You'll discover the exact 'Morning Oil' Columbia University scientists discovered can mimic the effects of the **Nuclear Factor 1-A gene...**

So you can reactivate **YOUR Metabolic BURN Commands** for easy fat loss...

And rid yourself of your 'fat suit' to bring out the happier version of yourself that you can be proud of.

But why did humans lose this nuclear fat-burning gene in the first place?

Researchers believe that our DNA changed in response to needing more stored-fat, to fuel our growing, hungry brains.

You see, **since the beginning of time...**

It's widely believed the human brain has tripled in size ^[16]...

This helped us humans rise above the Animal Kingdom and develop civilized societies.

But all that brainpower came with a hefty cost.

Fatness!

That's because **the human brain uses more energy**, pound-for-pound, **than any other tissue we know of.**

So deactivating the Nuclear Factor 1-A gene meant our ancestors could store more body fat to fuel their growing brains.

But...

Deactivating the Nuclear Factor 1-A gene is also what makes it so hard for us all to lose fat today!

Because instead of activating your metabolic BURN commands to melt off fat like a chimp...

You're now trapped activating your metabolic GAIN & HOLD commands ^[17].

This makes it incredibly easy to pile on the pounds.

It's why it's so tough to stick to your New Year's fat-loss resolutions, or to get into shape for your summer vacation.

And even when you manage to burn a few pounds of fat...

These metabolic gain & hold commands make it incredibly challenging to keep that fat off.

So if you've ever lost a ton of weight, only to regain it all back again, you now know your metabolic burn & hold commands are to blame.

And with *your body's genetics working against you like this, it's no wonder losing weight is such a struggle.*

Plus the worst part is:

Even if you're busting your gut in the gym each day...

With hour-long hardcore workouts...

And starving yourself on a calorie-restricted diet with nothing but bland 'health foods'...

Your body is still going to desperately cling onto every ounce of fat it can. ^[18]

That's why diets never seem to work for us.

And that's why you might feel frustrated and embarrassed when you end up regaining every ounce of fat you fought so hard to lose.

But I'm here to tell you, you're not a failure, and you don't need to feel embarrassed.

Because despite what many fitness gurus and so-called health experts will tell you...

It's not your fault that you can't lose weight!

You see, all the mainstream fat-loss advice telling you to:

- Eat less...
- Exercise more...
- Cut out carbs...
- And follow the latest fad diet...

All that advice is pitting you against your body's own genetics, and your deactivated fat-burning gene...

Because that deactivated Nuclear Gene is forcing your body to hold on to every pound of fat it can, as if your life depended on it. ^[18]

But don't worry:

Because when Ivy League Scientists discovered how **the deactivated Nuclear Factor 1A gene is keeping people fat...**

Researchers started searching for ***an alternative way to reactivate Metabolic BURN Commands*** in humans...

... *without* the Nuclear Factor 1A gene.

So it's with great excitement that I can share with you...

After multiple years of research and clinical trials...

They finally **cracked the code**...

Scientists at Columbia University have discovered how you can activate your Metabolic BURN Commands with a 'Morning Oil'^[1] ...

By **mimicking the effects** of your **deactivated Nuclear Factor 1-A** gene...

So you can start automatically burning off all of your unwanted body fat ***as easy as a chimpanzee!***

Scientists have found this Morning Oil can almost **instantly switch your body from fat-storage mode to fat-burning mode.** ^[19]

And the best part is:

It doesn't matter if you're a woman or a man...

... or if you're twenty-five or seventy-five...

... or if you've tried everything under the sun to slim down, and nothing has worked for you!

Because what these Ivy League scientists discovered is so simple, and so effective, anyone can do it.

Whether you're just looking to shrink your belly a little...

So you can look good in your favorite pair of jeans again...

Or whether you want to get rid of massive amounts of fat from all over your body...

And have your partner look at you with the same glint of admiration and respect in their eyes they had for you the day you first met.

You can take as much, or as little, of this 'Morning Oil' as you need to achieve your weight-loss goals.

I genuinely believe this new discovery is going to be a gamechanger for you.

And I'm incredibly excited to share all the details with you right now!

**It all started when Dr. Marie-Pierre and her team
of Columbia University Scientists...**

**... recruited 31 men & women for a
groundbreaking fat-loss experiment.** ^[1]

These 31 men & women were all **clinically overweight**...

And they had all been ***trapped at their current body weight for at least the past 6 months.***

But this study set out to find if a little-known Morning Oil could help them lose weight easily and almost effortlessly...

For this study...

The men & women were given blueberry & cranberry muffins to eat for breakfast each morning.

16 study participants were given muffins loaded with 10 grams of the special Morning Oil.

While the remaining 15 men & women were given ordinary muffins *without* the Morning Oil.

And here's where things got *really* interesting...

After just 4 weeks, the people eating Morning Oil Muffins had already burned off 3.75lbs of body fat.

That's almost **1 pound of fat loss per week**...

... every single week, like clockwork...

Just from eating these Morning Oil Muffins!

And remember:

All of these study participants had previously been *trapped* at their current weight for *over 6 months*...

... struggling to lose even an ounce of fat!

But as soon as they started eating these Morning Oil Muffins...

... the fat started melting off their bodies like magic.

Plus, it gets even better:

Because at the end of the experiment...

The **participants eating the 'Morning Oil' Muffins lost 56% more weight**... AND...

... burned over 6 & 1/2 times more belly fat...

... compared to those eating the regular muffins.

Therefore, proving just how effective this Morning Oil is at slimming down your waist...

... and ridding your body of all its unwanted fat.

But what makes this 'Morning Oil' such a brilliant fat burner?

Remember those Metabolic BURN Commands I was telling you about just a moment ago?

The Metabolic Burn Commands that are activated by the Nuclear Factor 1A gene in chimps...

So they stay *effortlessly lean*, without thinking twice about how much they eat.

Well...

This Morning Oil activates YOUR Metabolic BURN Commands... just like the Nuclear Factor 1A Gene does in Chimps...

... Jumpstarting your metabolism into fat-burning mode.

So you can *feel proud of your body again...*

With the **confidence** to wear clothes that **show off your body**, instead of covering up your belly like it's something to be ashamed of.

Now to understand how this Morning Oil does this...

You just need to know *what it is made from...*

And *how this can create a **dramatic metabolic shift inside your fat cells...***

... cranking your body's fat-burning processes up into high gear.

This 'Morning Oil' is made up of MCTs.

And more specifically, a very special type of MCTs.

(Not just the normal kind you might find at your local health store.)

But what exactly are MCTs?

MCT stands for **Medium Chain Triglycerides**.

Now I know that's a bit of a mouthful, and may sound quite complicated, but...

The way MCT's work is ***incredibly simple***.

You see, every type of fat is made up of molecules called **Triglycerides**.

But most of the fats in the food you eat are comprised of **long-chain** triglycerides...

And because they have a **longer triglyceride chain**, they take longer for your body to digest.

That's where MCTs are different...

And pay close attention to this, because...

This is the KEY that gives MCTs the power to activate your body's Metabolic BURN Commands.

Because MCTs have a **shorter triglyceride chain** than regular fats, your body digests them faster.

A lot faster!

In fact, they are digested by your body around ***10 times quicker*** than regular fats.

And this is important for 2 reasons.

Reason #1:

Since MCTs get metabolized so rapidly...

Your body doesn't have time to turn them into stored body fat. [20]

Meaning *even if* you eat WAY too many MCTs, they are unlikely to make you fat.

But more importantly...

Reason #2:

Because these MCTs are absorbed into your body so rapidly...

They practically ***trick your fat cells*** into thinking you've just consumed an enormous amount of food [21]...

And this changes the Metabolic Commands your fat cells are sending to your brain's hypothalamus [22]...

Taking those Metabolic Commands that were previously saying HOLD FAT, HOLD FAT, HOLD FAT...

... And switching them to start shouting BURN FAT, BURN FAT, BURN FAT!

Now if you recall earlier...

I told you how your brain's hypothalamus is like **your body's control center**.

And it has the power to control how much fat your body GAINS, HOLDS, or BURNS.

So when your hypothalamus starts receiving Metabolic Commands telling it to BURN FAT...

All of a sudden...

Your body starts producing more heat...

And starts burning off fat effortlessly, like a chimpanzee!

Forcing you to automatically burn a whole heap of extra calories... *even if you're just lying on your sofa and watching Netflix.* ^[22]

One study from the University of Geneva showed how 15 grams of MCT Oil helped people **automatically burn an extra 120 calories per day!** ^[23]

And things get even better...

Because when you eat **pure MCTs**...

Your body also starts producing much more of the *satiety* hormone, **leptin**.

It helps you feel fuller.

So you're more satisfied, and WAY less likely to crave fattening foods.

A 2017 study published in the Journal of Physiology and Behavior demonstrated this effect...

... when MCT Oil helped participants **eat 272 fewer calories per day... without even trying.** ^[24]

And now, instead of fighting against your body to lose weight...

You're working WITH your body to lose weight...

It's like **flipping a switch** that puts **fat loss on easy mode**.

Instead of clinging onto rolls of fat that have been making you feel unattractive for years...

Your body instantly switches to scorching fat from all your worst problem areas.

The best part is...

This change happens almost immediately...

As soon as you digest just a few grams of this special MCT Oil.

Remember: **that's because MCTs get metabolized so fast.** [25]

And that's what makes MCTs so amazing!

So by now, you're probably wondering...

How can YOU get your hands on some MCTs, too?

Well MCTs are most commonly found in coconut oil, and palm kernel oil.

However:

Coconut oil and palm kernel oil are NOT a good dietary source of MCTs.

That's because both of these oils also contain lots of Long Chain Triglycerides... or LCTs for short. [26]

(These are the normal types of fats that *your body digests 10 times slower than MCTs.*)

Meaning they are 10 times more likely to get stored as body fat.

Now obviously, that's something you want to avoid.

So that's why I recommend getting your MCTs from a pure MCT Oil Powder instead.

MCT Oil Powder is made by extracting and isolating the MCTs from coconut and palm kernel oil...

So you're just left with **100% MCTs**, which help make you skinny...

And none of the bad LCTs that can cause you to pack on the pounds.

This pure MCT powder is what these Columbia University scientists used in the muffins...

... that helped 16 ordinary Americans lose 1 pound of fat every 8 days...

And that's what you should use in the **muffin recipe** I'm about to share with you in a moment.

Plus if you don't want to spend time baking muffins, remember I'm also going to show you a shortcut that'll save you time and be just as effective.

However, most MCT Oil Powders come with 3 major problems.

Problem #1: Most MCT Powders use lower-grade MCTs.

Many manufactures cut corners with their MCT Powders...

And use a lower grade MCT called lauric acid to cut down on costs. [27]

That's because they'd have to charge **\$80 a jar** to maintain their same extortionate profit margins if they started using higher-grade MCTs.

But in moment...

I'll show you a clever way to get these premium high-grade MCTs that doesn't break the bank!

Now the problem with low-grade MCTs like lauric acid is...

They have a longer chain length compared to higher-grade MCTs...

... and ***this really makes my blood boil!***

Because this longer chain length means they are ***one small step away*** from being LCTs...

... which are the bad fats that *cause you to pack on the pounds.*

It's **absolutely ridiculous** that other companies will sell you these dirt-cheap MCTs...

... which defeat the entire purpose of taking MCTs in the first place...

And may even cause you to GAIN more fat, instead of burning it!

So if an MCT powder has lots of lauric acid in it...

... you'll want to stay clear of it!

And instead, stick with higher-grade MCTs like **caprylic acid** and **capric acid**.

This brings us on to...

Problem #2: Most MCT Powders have poor mixability.

Many MCT Powders are notoriously hard to mix with water...

And often end up in a clumpy mess that's practically impossible to consume.

I'll show you how you can avoid this problem in a minute.

But finally...

Let's look at...

Problem #3: Most MCT Powders taste yucky!

It's true!

So many MCT Powders and Oils taste so awful that they'll make you want to gag. And...

As for so-called 'flavorless' MCT Powders...

Whether you mix them with water, milk, shakes, or oatmeal...

... they give everything a chalky texture that *feels revolting in your mouth*.

And if your MCT Powder doesn't taste good, you're not going to want to use it...

Meaning you'll miss out on so much easy fat-loss. So...

When I realized MCT Powders had these 3 major problems, I was fortunately in a situation to do something about it.

The first people that came to mind to fix these issues were my friends over at WellMe.

That's because:

WellMe specializes in creating health solutions that go the extra mile!

Their team of doctors, pharmacists and nutritionists are leading innovators in developing health solutions that are found in nature, and backed by research.

So I knew WellMe would be more than capable of creating a new & improved type of MCT Powder.

- An MCT Powder that only contains the same high-grade MCTs used in

clinical trials, to deliver the best fat-loss results possible...

- An MCT Powder that doesn't go clumpy when you mix it with water...
- And an MCT Powder that tastes so good, you actually look forward to taking it each day... either as a delicious drink... or baked into some tasty breakfast muffins...

After months of research, sourcing the highest-quality ingredients...

... and dialing in the flavor...

... WellMe went above and beyond to deliver an MCT Powder that stands apart from the rest.

It's called...

Lean MCT™

It's a *tasty cocoa-flavored 2-part formula*, consisting of our **premium MCT Oil mix...**

... along with our **proprietary metabolism-boosting blend.**

Simply stir one scoop into water, milk, or your favorite milk substitute, and enjoy the flavor.

It tastes like creamy chocolate milk!

With every sip you take...

The premium MCT Oil starts **altering your 'Metabolic Commands' switching your body into fat-burning mode...**

While the metabolism-boosting blend puts your fat burning on high heat, accelerating your results.

These unique blends were created and tested by the team at WellMe...

So there's nothing else quite like them in the world.

The only place you can get them is inside Lean MCT™.

And based on the feedback from people like you...

The WellMe family loves Lean MCT™

Just ask Stephanie Landers, who says:

"I do have more energy and it has worked for me as an appetite suppressant. I've noticed that I've actually lost 4 pounds in the last 7 days."

And Desiree Martell who said:

"This really helped boost my weight loss. And as I was going through the week, I was not as hungry throughout the day."

Each month, our customers enjoy over **XX,XXX** servings of our MCT Powder.

Most customers order multiple jars at a time.

And they love its effects so much, they keep coming back for more!

That's because:

The ingredients in Lean MCT™ are precisely dosed for optimal results

One serving of Lean MCT contains the **EXACT same dosage of MCT Oil** used in the Columbia University weight loss study. ^[1]

Remember:

That's the study where the **16 ordinary Americans lost 1lb of fat, every 8 days...**

... just by eating these MCT Oil muffins for breakfast.

That's why our powder works so well.

And that's why it's a research-backed method to alter your Metabolic Commands that are keeping you fat...

... switching your body into fat-burning mode...

... so you can **regain your energy and passion for life**, and **love** the way your body looks every time you see yourself in the mirror.

What's more:

WellMe lived up to their reputation of going above-and-beyond...

And on top of creating a fast, easy, and research-backed way to activate your body's fat-burning capacities...

We added a second blend to **turn up the temperature of your body's internal furnace...**

... to really accelerate your fat-burning results.

It's called the...

Metabolism-Boosting Blend™

It's comprised of 3 different B Vitamins – pyridoxine, folate, and cobalamin.

These B Vitamins are essential for your body to burn through fats, proteins, and carbohydrates from the foods you eat ^{[28], [29]} ...

... so you **scorch** their energy off fast...

... preventing it from being stored as excess body fat.

This was demonstrated in a 2019 study, published in the medical journal, Nutrients...

Where people who consumed more B Vitamins were **38% less likely to be obese.** ^[30]

And finally...

None of this matters unless the MCT Powder tastes delicious.

Unlike most 'health powders' out there...

We insisted Lean MCT™ had to taste superb!

Because frankly, that's where a lot of powders fall short.

So the team at WellMe spent many months testing, and re-testing, the powder's taste.

And we're incredibly excited about how it turned out!

One of our many happy customers, Jennifer Cornoyer, even sent in to say:

"It actually tastes pretty good, which I was actually very pleasantly surprised."

And another, Ben F., told us:

“At breakfast, I mix a scoop into a glass of milk. It tastes like creamy chocolate milk. My toddler always begs for a sip!”

It’s flavored with all-natural, low-calorie cocoa...

And sweetened with zero-calorie stevia to make it taste extra delicious.

Plus...

Unlike most MCT powders, it mixes easily with water, without clumping...

So you can drink it each morning...

... to activate your body’s fat-burning mode for the rest of the day, every single day.

Or if you’re feeling a little more adventurous...

You can even bake the powder into **tasty breakfast muffins...**

Just like they did in the groundbreaking Columbia University fat loss study I told you about earlier.

In fact, it’s so simple, here’s...

How to bake tasty MCT Powder Muffins in 3 easy steps.

Step 1:

Start by lining your muffin tray with paper muffin cases, and set your oven to 400 degrees Fahrenheit.

Step 2:

Take a large bowl and beat 2 eggs lightly for 1 minute with an electric mixer.

Add 250ml of semi-skimmed milk...

Plus, 2 scoops of Lean MCT...

And whisk the mix until you have a smooth batter.

Once you’re done whisking, add in 400 grams of self-rising flour, and whisk again until your mixture is smooth.

And...

Step 3:

Finally, you can top off the mix with a handful of blueberries or cranberries...

... (just like they did in the Columbia study) to make your muffins taste berry-tastic...

... before scooping the mixture into your muffin cases, and baking for 25 minutes.

As you can see, it's incredibly simple!

But don't worry about writing all that down right now.

When you claim your supply of Lean MCT today, you'll also receive this simple recipe.

So you can soon be baking these incredible fat-loss muffins in your kitchen with ease.

But remember:

Even if you don't feel like baking muffins...

You can always enjoy your Lean MCT as a tasty-beverage that takes less than 30 seconds to make!

With Lean MCT our WellMe family is reporting...

- Compliments from their friends, co-workers, and family about how they're looking so much slimmer...
- Feeling full and satisfied all day long, with no more intense cravings for fattening foods...
- Finally fitting into their favorite clothes again, that have been collecting dust in their closets for years...
- Getting more attention from their partners...
- And here's what I'm most proud of: the women & men who try **LeanMCT™** are reporting feeling more body-confident than they have in years...

But don't just take my word for it...

Here's what just a few of the folks who've tried Lean MCT are saying:

Amber Parsons is excited to report:

"I just take it after my breakfast in the morning. It definitely keeps me full. The huge thing I have noticed with it is an increase in energy."

And Desiree Martell happily said:

"It would help me stay full until about 4pm. Like I feel good, I feel great. I have a lot of energy and I'm more focused on what I'm doing throughout the day."

No other natural fat-loss support supplement has achieved anything like the dramatic results that I've seen in our Lean MCT customers.

Which is why Lean MCT is one of WellMe's most popular health supplements.

Most customers order multiple jars at a time, and keep coming back to restock their supplies.

But the only downside to this surge in demand for Lean MCT is that it sometimes goes out of stock.

We only order our ingredients from the highest quality suppliers who we trust...

And we put every single batch of Lean MCT through strict quality-control measures to ensure every bottle is certified non-GMO, Guaranteed Pure, and Made in the USA.

This level of quality assurance takes it's time...

So any slow down in our delicate farm-to-bottle process can mean Lean MCT is unavailable for a few weeks or even months.

But with all that being said...

I hate to imagine anyone continuing to *feel hopelessly trapped with their fat...*

And **ashamed** of their own body...

All because their Metabolic Burn Commands are not being triggered.

Especially when there's such a simple, natural solution to rapidly activate your

Metabolic Burn Commands with MCTs.

After all, it's as simple as *mixing 1 scoop of Lean MCT with 8 ounces of water, milk, or your favorite milk alternative...*

Or if you are feeling a little more adventurous, you can follow the simple Muffin Recipe that comes with your jars of Lean MCT...

And get your daily dose inside your breakfast muffins.

But here's the vital part:

It's important you take Lean MCT every day for at least 30 days.

Because while the fat-burning benefits start to work on a molecular level from Day 1...

The longer you use your Lean MCT...

The longer your body can keep triggering your Metabolic Burn Commands helping you continue to **slim down** into a **body you'll love**.

But if you miss a day of Lean MCT, your body could slip back into fat-gaining mode, and reverse your progress.

That's why it's so important you don't miss a day.

And also keep in mind the breakfast muffin study we looked at from Columbia University.

That study lasted 16 weeks...

And showed how participants lost more and more fat over time.

So while improvement happens quickly, it gets even better the longer you use it.

That's why I recommend that you claim at the very least a 3-month supply of Lean MCT...

Or if you're very determined to achieve **a slimmer body your partner will admire**, and that **you** can be proud of...

Claim your complete 6-month supply for the most guaranteed results.

Plus, because Lean MCT is only available on this website...

By claiming 6-month supply, you won't have to worry about us running out of stock any time soon due to high demand.

Now due to the laws of supply and demand...

You can probably understand why the regular retail price of Lean MCT is **\$69 for a 30-day supply.**

But that just doesn't sit right with me...

Not because I think the price is unreasonable.

After all, joining a gym to lose weight will easily set you back over \$300 a year...

And hiring a personal trainer would cost you **\$300 a month...**

If not more!

And if you were to try the latest trendy fat-loss diet – that isn't backed by nearly the same level of research as this MCT Oil – and comes with ZERO guarantees...

You'll end up spending **thousands of dollars extra** on groceries each year...

... just to eat food you don't even like!

But for us, this isn't about making money.

**It's WellMe's mission to help millions of people,
just like you, achieve amazing fat-loss
transformations...**

... so they can start feeling proud and confident in the way they look!

So while I do believe that \$69 per jar wouldn't be unreasonable...

I insisted to WellMe's Chief Financial Officer that Lean MCT™ be as affordable as possible.

That's why we're offering a temporary discount on a one-month supply of Lean MCT.

But better still...

We've created a special discount program for first-time customers.

So the more jars you order, the more you save!

Most of our customers stock up and claim multiple bottles.

And I recommend choosing the 6-month supply to guarantee the best fat-loss results, and lock in the biggest savings.

Plus on top of those savings, WellMe is covering 100% of the cost for shipping and handling.

But I must warn you...

This discount program and free shipping is only available for a limited time, and only while stocks last.

And because I want you to be 100% confident in your decision to start your fat-loss journey today, you'll be backed by...

The WellMe 100% Satisfaction Guarantee:

We believe our customers deserve the very best we have to give...

So we work to the highest industry standards in everything we do.

Lean MCT™ is formulated by a team with decades of medical experience...

And backed by thorough research, sound medical proof, and external auditing for your peace of mind.

That's why we can confidently guarantee...

You'll either love how **Lean MCT™** helps fat melt off your body with ease...

... or we'll refund you 100%, no questions asked.

We won't even ask you to return your jars.

That means you either love Lean MCT™ or you get your money back with a simple phone call or email. (The contact info is printed on each jar).

Now you've seen how Lean MCT™ activates your Metabolic BURN Commands to promote fat loss...

And you've seen how each serving includes the EXACT dosages of MCT shown in clinical trials to deliver groundbreaking fat-loss results...

Plus you've also seen how thousands of people just like you are enjoying Lean

MCT™ to *achieve their dream body goals.*

Now the power is in your hands, and it's decision time.

You've got two choices you could make.

Choice #1:

You could choose to ignore all of this.

Ignore the fact that there's a new research-backed way to stop your body clinging onto fat...

... and instantly switch your body from fat-storage mode to fat-burning mode.

Ignore the incredible results of the Columbia University study...

... where 16 ordinary Americans, just like you, easily lost 1lb of fat every 8 days, like clockwork...

... with **the same form of high-grade MCTs you can get your hands on today.**

And you could let the curiosity and hope you have about this MCT Oil Powder fade away.

That's a legitimate decision...

And if that's what you choose to do, we support you in making that decision.

But before you make up your mind...

Let me ask you one quick question:

If you've been trapped in an overweight body for years...

... feeling unattractive and dissatisfied with the way you look...

Or if you feel yourself getting heavier, more tired, and more fed up with your daily belly fat struggles...

And if you've tried diets and exercise regimes before, only to yo-yo back to where you started...

What's going to change for you if you don't

take action today?

If you're sick of pretending to the world that you're 'OKAY' with the body you have right now...

What's going to free you from being trapped inside your layers of fat...

... and allow you to finally get the body that you *really* desire?

The bottom line is:

You're not going to achieve your fat-loss goals by doing the same things that have already failed you in the past.

If you want fat-loss success...

You have to be open to trying something new, and research-backed like Lean MCT™.

Which brings us onto...

Choice #2:

Instead of giving up the hope you feel today for achieving your ideal body...

Hold onto that feeling and let it guide you towards achieving a trimmer body.

A body that your partner will love...

And more importantly, a body that YOU can be proud of!

Now that **you've seen how easy it is to activate your Metabolic BURN Commands** with high-grade MCT Powder...

And you've seen how well it's already working for thousands of WellMe customers...

Your next step is to experience that fat-loss success for yourself.

You deserve to be in great shape...

And hear **compliments from all your friends** about how much slimmer you're looking...

And smile to yourself when they all ask you **“what your secret is!”**

You deserve to **feel excited about walking around with your newly-toned belly on show at the beach...**

... because of how confident it makes you feel.

And you deserve to **look at yourself in the mirror and LOVE what you see!**

Making that dream a reality is well within your reach. Because...

Those are the kind of real results people like you are already experiencing with Lean MCT™ ...

And there's no reason why you can't join them!

All the clinical trials and research behind our ingredients have shown...

... the longer you keep taking these pure MCTs, the more fat you can burn.

Plus...

Because our MCT Oil Powder can reduce your food cravings, and help you keep off the weight you've lost...

It makes a lot of sense to make Lean MCT™ a permanent part of your daily routine.

That way...

You're activating your Metabolic BURN Commands every single day...

Which will help keep your body in fat-burning mode for the long haul...

And prevent your body from slipping back into its old *fat-storing* AND *fat-gaining* ways.

So if you're ready to create your own fat-loss success story, **the time to act is NOW.**

We stock a limited supply of Lean MCT™ ... and jars are flying off the shelves fast.

So I really can't stress enough how important it is that you act quickly if you

want to secure your own supply.

And remember...

It's all **completely risk-free** thanks to the WellMe No-Questions-Asked, 6-Month, 100% Money-Back Guarantee.

Either you get massive fat-loss results...

... or you get all your money back.

You've got nothing to lose, apart from your unwanted fat.

So what are you waiting for?

Just select your quantity of jars below, and choose how much you want to save.

Each jar has a 2-year shelf life, so I recommend that you...

Choose the largest supply for the biggest savings.

Please click below to claim your 6-Month Supply of Lean MCT™, right now...

... or whichever size supply is right for YOU... and start your fat-loss success journey today.

Questions from the Community:

What ingredients are inside Lean MCT?

Here's a full list of all the research-backed, fat-burning ingredients you'll get in every serving of Lean MCT.

[IMAGE OF LABEL]

How do I know Lean MCT is pure & safe?

As is suggested when starting any new health program, we recommend

that you consult with your personal physician before you get started.

But rest assured, you can be confident in the purity and safety of Lean MCT.

It is manufactured to the strictest standards.

And we also focus on only using natural ingredients that your body already knows how to use, and which gently, naturally support your health.

What kind of effects will I feel from taking Lean MCT?

The ingredients inside Lean MCT have been scientifically shown to activate your Metabolic BURN Commands, to get your body burning fat faster than ever before

What's more, numerous clinical studies have shown how the ingredients can also reduce feelings of hunger, speed up the metabolism, and increase energy levels.

How long will it take to feel the effects?

In the 'muffin study' from Columbia University, participants reported losing a pound of body fat in just over a week, and almost 4 pounds after 1 month.

However, your results may vary as everybody is unique. You might experience faster results than that, or your results may come slightly slower.

But to see results from Lean MCT as quickly as possible...

... we recommend taking the powder as directed on the jar, eating a healthy diet, and keeping active.

How quickly will I receive my order?

We will process your order as soon as you claim your supplies at the order link on this page. And your order will then arrive on your doorstep within 7-10 business days, if not sooner.

How do I take Lean MCT?

Just mix 1 scoop of powder with 6-8 ounces of water, milk, or milk-alternative of your choice...

... to enjoy a deliciously-chocolatey, low-calorie beverage.

Or bake the powder into brownies for a tasty breakfast treat.

Most customers prefer to enjoy their Lean MCT in the morning. That way, they can enjoy the benefits throughout the rest of the day.

What if I'm not happy - can I get my money back?

While the ingredients inside Lean MCT can benefit everyone who takes them, it remains a fact that results can vary.

If you're not happy with Lean MCT for any reason, even if the jars are empty, simply contact us for a complete refund.

We won't even ask you to send back the jars.
